

Migration to EvaluateMySchool version 2

Version 2 of EvaluateMySchool is now live. All evaluations from the previous version, including all scores, comments and evidence have been brought over.

What's new?

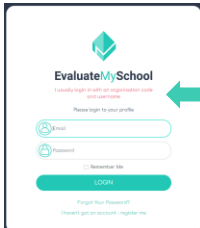

In version 2 every individual has their own login. This allows greater control over permissions and features such as resetting your password. User accounts can register for free and you can have as many users on your evaluation as you like. In this new version you can do everything you could before but also:

- Create and export action plans, based on your evaluation
- Create and edit your own evaluations
- Group your schools into their own dashboards
- Analyse a new graph to show progress over time
- Greater control over evaluation participants

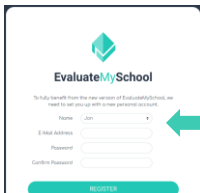

How do I create a login?

If you previously logged into EvaluateMySchool with an organization code, username and password, you can migrate your account in the following way:

1. Go to www.evaluatemyschool.co.uk
2. Click on Login
3. Click on “I usually login in with an organisation code and username”

4. Login as you would normally
5. Select your name from the drop down list, enter your email and choose a password, then click on Register

6. You will be sent an email to confirm your email address (this may take a couple of minutes to arrive)
7. You are set. All your comments, evidence and scores are now associated with you. From here on in, log in with your email address and password.

What if I get stuck?
